The MIXBRO PROMISE

Your MIXBRO is like your best mate: No matter what project - you can always rely on him or her.

- FORCE CONTROL**
- SHOCK GUARD**
- SMART AIRFLOW**
- QUICK COUPLING**
- TWIN SPEED**

*only applies to M150

- SHOCK GUARD**: Rubberised corners to protect the machine and surfaces in the event of falls
- FORCE CONTROL**: Switch with electronic speed control, prevents spraying material
- SMART AIRFLOW**: Protection against the ingress of dirt and splash water into the housing
- TWIN SPEED**: 2 gears, for materials of different consistencies*
- QUICK COUPLING**: HEXAFIX Tool-free paddle change depending on the material to be mixed

THE MIXER DOES THE JOB: MATCH YOUR MIX

Modern materials are characterised today by a wide range of components. Mixing them optimally requires the right paddle. The quantity determines the diameter. Your MIXBRO will help you make the right choice!

Paddle geometry: depending on material

Connection type: depending on mixer-connection

WK 120 HF

Paddle Diameter: depending on mix quantity

Has it already CLICKED! for you?

HEXAFIX

All MIXBROs have an integrated HEXAFIX® coupling - for changing the paddle in seconds without tools!

MIXBRO

by Collomix

READY. MIX. GO.

Clever for the perfect mix:
Put together your personal MIXBRO - and mix easier and faster.

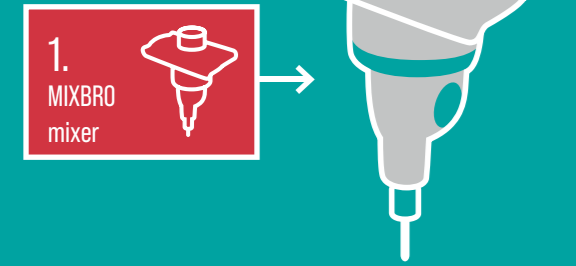

MIXBRO[®]

by Collomix

The MIXBRO PRINCIPLE

Take the test now and in 2 steps find the perfect mixer and paddle combination:

Choose your suitable mixer!

HEXAFIX

All MIXBROs have an integrated HEXAFIX® coupling - for changing paddles in seconds without tools!

Choose your specialised paddle!

What quantity?

Choose the right mixer for you:

MIXBRO M150

Uncomplicated top performance for daily use

- » Reliably withstands professional requirements.
- » Mixing at two speed levels thanks to two speeds.

- 70 l

Mix quantity	- 70 l
Output	1500 W / 230 V
Number of speeds	2 speeds
On-load speed	-410/-650 rpm
Weight	4.93 kg

Suitable for the Collomix paddles up to max. Ø 140 mm

HEXAFIX

MIXBRO M130

Efficient powerhouse for regular use

- » Reliable power for frequent mixing.
- » 1-speed machine with the perfect balance of performance and handling.

Mix quantity	- 50 l
Output	1300 W / 230 V
Number of speeds	1 speed
On-load speed	-600 rpm
Weight	4.25 kg

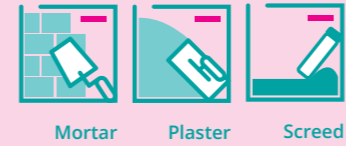

Choose your specialised paddle:

VISCOUS

Collomix WK

for viscous mixtures
Walls, plastering, insulating

Mortar

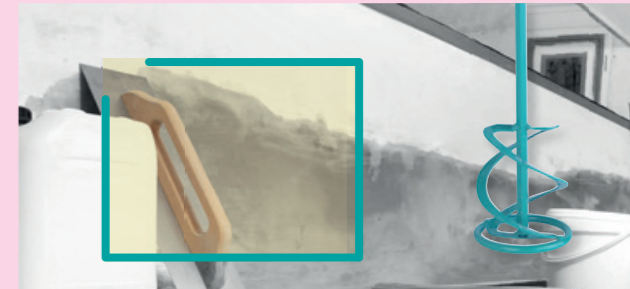

Plaster

Screed

MORTAR

Mortars are usually sand-filled masses for bonding stones. A paddle is used for these heavy and viscous mixes, which conveys the ingredients from the bottom to the top.

PLASTER

Plasters are so-called soft plasticised or pasty mortars for coating masonry indoors and outdoors.

CREAMY

Collomix KR

for creamy mixtures
Tiles, sealing, levelling

Tile adhesive

Putty

Levelling compound

TILE ADHESIVE

Tile adhesives consist of the finest sands and a high proportion of powder. Upon contact with water, these tend to form lumps - however, the right paddle dissolves these immediately when mixing.

PUTTY

Levelling compounds are used to smooth surfaces. A smoothly mixed material that is easy to work with is important for achieving an even, smooth result.

LIQUID

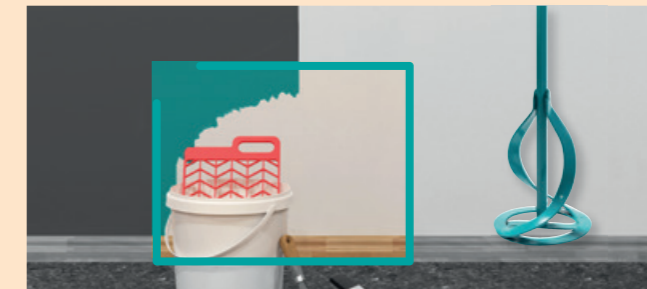

Collomix FM

for liquid mixtures
Painting, varnishing, coating

Paint

Coating

PAINT

If you tint paints yourself, you should make sure that the mixture is homogenised and streak-free - this is the only way to ensure that the end result is uniform and achieves the desired colour tone.

COATING

Liquid coatings are often offered on a synthetic resin basis. Two components have to be intensively mixed together here. Caution: Curing begins shortly after mixing.
