Level cap Spin Level 100 pcs

Article no: 205161

Used in conjunction with Level cap Spin. For floor and wall panels with thickness up to 12 mm and only 1 mm grout line. Located under the plate. Screw by hand on the level screw until the plates are level with each other. Can be adjusted as needed. Needs no mounting tool. Can be reused.

SPIN LEVELING SYSTEM

Spin leveling system prevents uneven surfaces from occurring when mounting large plates. With a patented design that automatically auto rotates the Level cap on the the Level screw with minimal effort, it is possible to tighten and adjust the level cap only with one hand.

Spin Level is mounted quickly without any installation tools and with high precision. The system consists of three parts, level screw, level cap and level shield where both the cap and the shield can be reused to multiple jobs.
