Quantity	100 qty/pack

Level shield Spin Level 100 pcs

Article no: 205162

Placed between the level cap and the floor or wall plate to avoid friction between them. Needs no mounting tool. Can be reused.

SPIN LEVELING SYSTEM

Spin leveling system prevents uneven surfaces from occurring when mounting large plates. With a patented design that automatically auto rotates the Level cap on the the Level screw with minimal effort, it is possible to tighten and adjust the level cap only with one hand.

Spin Level is mounted quickly without any installation tools and with high precision. The system consists of three parts, level screw, level cap and level shield where both the cap and the shield can be reused to multiple jobs.
