PL 04AL / Aluminum stop bead

Application: stop bead is a component of gypsum board system that protects corners and joints of drywall. It is made of aluminum (AI) required for installation of Drywall system

Advantages:

- Easy to install;
- Clean finish, especially with different or uneven surfaces;
- Leaves no edges when stopped;
- Can be attached to all gypsum plasterboards;
- Generally used for the forming of straight lines.

Technical data:

Product code	EAN	Material	Dimensions	Length	Package
ALB-PL-04AL-25	4751023401485	Aluminum	23 x 13 mm	2,50 m	200 pcs.

Installation tips:

- The stop beads have a perforated, recessed edge and are used where the edge of the building board is not exposed;
- Fixed to the sheet of building board with an adhesive or staples, with the finishing coats bonding into the building board and feathering up to the bead nib;
- Ideally used for door jambs and window returns.

Storage:

A horizontal storage position is recommended. The profiles need to be stored in a dry place the temperature range of -5°C to +40°C. Maximum recommended storage time is 24 months.

MADE IN EUROPE
