

Small countersunk head with cross drive PZ, blue zinc-plated, full thread

APPROVALS

ADVANTAGES/BENEFITS

- The strap hinge screw has a small 5 mm head which ends flush with the hinge. This provides a firm connection with a high-quality appearance and reduces the risk of injury from protruding screw heads.
- The double cone at the transition from the head to the shank of the screw increases the turning torque. This keeps the screw from twisting off.

ADVANTAGES/BENEFITS

- The strap hinge screw has a small 5 mm head which ends flush with the hinge. This provides a firm connection with a high-quality appearance and reduces the risk of injury from protruding screw heads.
- The double cone at the transition from the head to the shank of the screw increases the turning torque. This keeps the screw from twisting off.

FUNCTIONING

- The yellow zinc or blue zinc-plated screw can be used to match the hinge or piano hinge being used.
