

# Touchstat™ Digital Thermostat

## Overview

The Touchstat thermostat enables end users to choose the time as easily as they would with a watch or clock and quickly set their programs – heat on when they want it and off when they do not need it.

### Better

Easy-to-use interface and intuitive design.

With Touchstat, end users can simply program their settings to suit individual requirements, warmer when they are at home, lower when they are away or asleep.

### Faster

Set-up takes just minutes to get right the first time. It will help avoid wasting energy and achieve savings on utility bills.

Suitable with all Warmup underfloor heating systems, the Touchstat thermostat allows you to control the temperature of your underfloor heating to give you comfort, warmth and luxury to match your specific needs.
