

The approved stand-off installation with thermal barrier in external thermal insulation composite systems (ETICS)

VERSIONS

- zinc-plated steel
- stainless steel

BUILDING MATERIALS

Approved for:

- Concrete, cracked and non-cracked
- Vertically perforated brick
- Hollow block made from lightweight concrete
- Perforated sand-lime brick
- Solid sand-lime brick
- Solid brick

Also suitable for:

- Aerated concrete

APPROVALS

ADVANTAGES

- When combined with the injection mortars FIS V and FIS EM, the stand-off installation is approved for high loads in a range of materials. This allows for a secure fixing.
- Usage lengths of 60 to 295 mm can be covered with just one Thermax.
- The plastic cone creates a thermal barrier between the fixture and the inner fixture, and offers an energy-optimised fixing.
- The glass-fibre-reinforced plastic cone cuts its own way through the ETICS with a positive fit, and allows for a simple, fast and adjustable installation without the need for any special tools.

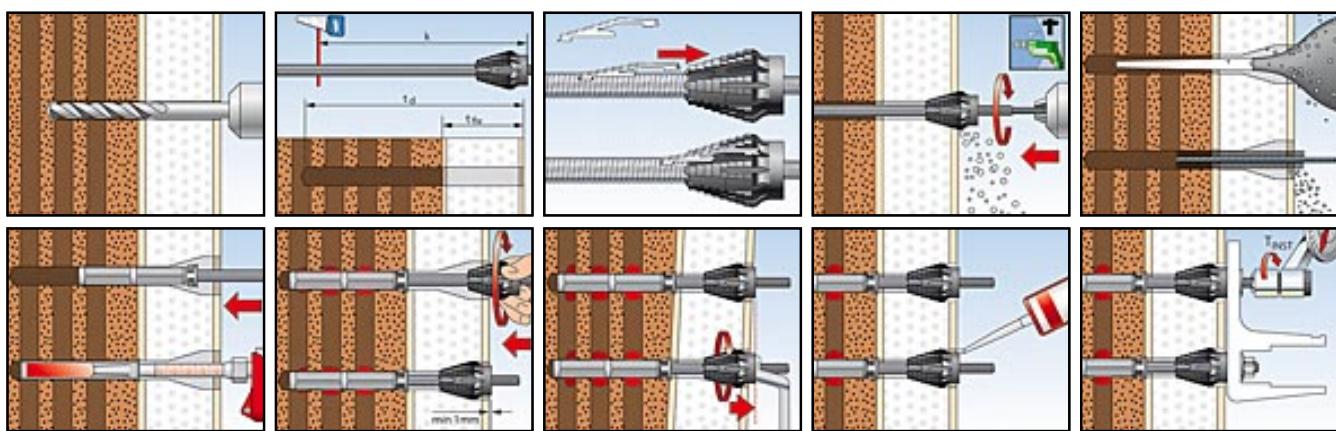

APPLICATIONS

For the thermally separated fixing of:

- Awnings
- Canopies
- French balcony railings
- Brackets
- Air conditioning units
- Satellite dishes

FUNCTIONING

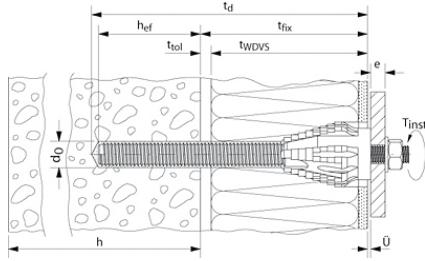

- The Thermax 12 and 16 systems are suitable for pre-positioned installation.
- The self-tapping, glass-fibre-reinforced cone cuts its own way through the plaster into the insulation during installation.
- The anti-cold cone uses a thermal barrier to minimise heat losses.
- In the case of resistant plaster (e.g. thick cement plaster), it is recommended that the Thermax cutting blade included is used for grinding out the plaster.
- The sealing of the annular gap with the adhesive and sealant KD seals the façade at plaster level.

TECHNICAL DATA

Stand-off installation Thermax 12 / 16

galvanized

Article name	Art.-No.		Contents
Thermax 12/110 M12	051291	•	20 M12 threaded rods, 20 anti-cold cones, 20 M12-A4 setscrews, 20 A4 washers, 20 A4 nuts, 20 perforated sleeves 20 x 130, 5 bit, 5 cutting blades, 5 user manuals
Thermax 12/110 M12 B	051290	•	2 M12 threaded rods, 2 anti-cold cones, 2 M12-A4 setscrews, 2 A4 washers, 2 A4 nuts, 2 perforated sleeves 20 x 130, 1 bit, 1 cutting blade, 1 user manual
Thermax 16/170 M12	051293	•	20 M16 threaded rods, 20 anti-cold cones, 20 M12-A4 setscrews, 20 A4 washers, 20 A4 nuts, 20 perforated sleeves 20 x 200, 5 bit, 5 cutting blades, 5 applicator tip extension hoses, 5 user manuals
Thermax 16/170 M12 B	051292	•	2 M16 threaded rods, 2 anti-cold cones, 2 M12-A4 setscrews, 2 A4 washers, 2 A4 nuts, 2 perforated sleeves 20 x 200, 1 bit, 1 cutting blade, 1 applicator tip extension hose, 1 user manual

stainless steel A4 (1.4571)

Article name	Art.-No.		Contents
Thermax 12/110 M12 A4	051537	•	10 M12-A4 threaded rods, 10 anti-cold cones, 10 M12-A4 setscrews, 10 A4 washers, 10 A4 nuts, 10 perforated sleeves 20 x 130, 3 bit, 3 cutting blades, 3 user manual
Thermax 16/170 M12 A4	051543	•	10 M16-A4 threaded rods, 10 anti-cold cones, 10 M12-A4 setscrews, 10 A4 washers, 10 A4 nuts, 10 perforated sleeves 20 x 200, 3 bit, 3 cutting blades, 3 applicator tip extension hoses, 3 user manual

¹⁾ Required safety factors are considered.

²⁾ For single fixation see approval.

³⁾ For combinations of tensile loads, shear loads, bending moments as well as reduced edge distances or spacings (anchor groups) see approval.

⁴⁾ Values are valid for rotary drilling (without hammer action). KSL must have a thickness of the outer web of min. 30 mm (old bricks).

⁵⁾ 1 mm displacement under short term applied load (e.g. wind load).

⁶⁾ The given loads are valid for fixations in dry and humid concrete for temperatures in the substrate up to +50°C (resp. short term up to 80°C) and drillhole cleaning according approval.

⁷⁾ For further conditions see approval.

⁸⁾ Masonry with satisfactory surcharge and no edge influence.

⁹⁾ Fixing screw M12.

¹⁰⁾ The fixed anchorage depth is corresponding with the relevant anchor sleeves FIS H.K (see technical data).
