## Plastic channel Coverboard

**Article no:** 776775

Light shock-absorbing protective plastic boards with channel structure. Protects surfaces such as walls and floors during new construction and renovation. Easy to assemble, easy to clean, can be reused and have a very low weight. The boards are also foldable, which makes them both easy to use and transport. Dimensions: 120x240 cm (2.88 m<sup>2</sup>). Delivered in packaging of 10 pcs and the boards are folded to fit on a pallet (80x120 cm). Can be recycled as plastic.

Coverboard is a very good alternative to cover paper and heavy masonite boards.
