CRM-2T

Delay ON star / delta

## Characteristic

- designated of delay On of motors star/delta

## CRM-2T/230V, CRM-2T/UNI

time t1 (star)

- time scale $0.1 \mathrm{~s}-100$ days - devided into 10 time ranges ( $0.1 \mathrm{~s}-1 \mathrm{~s}$ /
$1 \mathrm{~s}-10 \mathrm{~s} / 0.1 \mathrm{~min}-1 \mathrm{~min} / 1 \mathrm{~min}-10 \mathrm{~min} / 0.1 \mathrm{~h}-1 \mathrm{~h} / 1 \mathrm{~h}-10 \mathrm{hrs} /$
0.1 day -1 days / 1 day -10 days / 3 days -30 days / 10 days -100 days)
- rough time setting by rotary switch
time t2 (delay) between $\lambda / \Delta$ :
- time range $0.1 \mathrm{~s}-1 \mathrm{~s}$
- fine time setting by potentiometer
supply voltage: AC $230 \mathrm{~V}, \mathrm{AC} / \mathrm{DC} 12-240 \mathrm{~V}$
- output contact: 2 x changeover 16 A

## CRM-2T/24-480V

- time t1 (star)
- programmable time from 0.1 s up to 1 hr ., divided into 5 ranges
( $0.1 \mathrm{~s}-1 \mathrm{~s} / 1 \mathrm{~s}-10 \mathrm{~s} / 0.1 \mathrm{~min}-1 \mathrm{~min} / 1 \mathrm{~min}-10 \mathrm{~min} / 0.1 \mathrm{~h}-1 \mathrm{~h}$ )
- time range gross setting is performed using a turn switch
- fine time setting is performed using a potentiometer
time t2 (delay) between $\boldsymbol{\lambda} / \Delta$ :
- time range $0.025 \mathrm{sec}-1 \mathrm{sec}$
- time is set by using by potentiometer
supply voltage: AC/DC 24-480 V
output contact: $2 \times$ NO 8A
output indication: multifunction red LED
- 1-MODULE, DIN rail mounting

## Description

## CRM-2T/24-480V

## Symbol

CRM-2T/UNI, CRM-2T/230V
CRM-2T/24-480V

## Connection

CRM-2T/UNI, CRM-2T/230V

start of a motor
auxiliary voltage

start up of motor $(\lambda-\Delta)$

## More accurate setting of timing for long periods of time

Example of time setting to 8 hours period:
For rough setting use time scale 1-10s on the potentiomenter.
For fine time setting aim for 8 s on potentiometer, then recheck accuracy (using stopwatch etc).
On rough time setting, set potentiometer to originally desired scale 1-10 hours, leave a fine setting as it is.

## Warning

Device is constructed for connection in 1-phase AC/DC $12-240 \mathrm{~V}$ and 230 V or $24-480 \mathrm{~V}$ main alternating current voltage and must be installed according to norms valid in the state of application. Connection according to the details in this direction. Installation, connection, setting and servicing should be installed by qualified electrician staff only, who has learnt these instruction and functions of the device. This device contains protection against overvoltage peaks and disturbancies in supply. For correct function of the protection of this device there must be suitable protections of higher degree ( $\mathrm{A}, \mathrm{B}$, C) installed in front of them. According to standards elimination of disturbancies must be ensured. Before installation the main switch must be in position "OFF" and the device should be de-energized. Don't install the device to sources of excessive electro-magnetic interference. By correct installation ensure ideal air circulation so in case of permanent operation and higher ambient temperature the maximal operating temperature of the device is not exceeded. For installation and setting use screw-driver cca 2 mm . The device is fully-electronic - installation should be carried out according to this fact. Nonproblematic function depends also on the way of transportation, storing and handling. In case of any signs of destruction, deformation, non-function or missing part, don't install and claim at your seller. After stop using the product it is possible to demount and recycle.
