

R-TFIX-CAP63-MW Mineral wool cap

Post-installed mineral wool cap reduces heat transmission and results in a homogeneous insulation surface

Approvals and Reports

- ETA 17/0161
- UKTA-22/6348

Product information

Features and benefits

- Cost-saving solution, as countersunk installation allows selection of shorter fixings.
- Results in homogeneous and smooth insulation surface
- Post-installed cap reduces heat transmission at fixing points

Applications

- Mineral wool (MW) boards

Base materials

- Approved for use in:**
- Mineral Wool Boards

Installation guide

1. Pre-assemble TFIX-8S-SETTING DEVICE with TFIX-8S fixing and then make installation of screw fixing
2. Drill a hole of required diameter and depth
3. Lightly tap the plastic sleeve through the insulation material into hole with a hammer, until fixing depth is reached
4. When using the TFIX-DEVICE the teeth should be embedded in the insulation material after hammering.
5. Tighten screw (using special TFIX-8ST-TOOL setting tool) until fixing is secure and flush with insulation material
6. Embedment depth of min 25mm in A,B,C,D materials and 65mm in Aerated Concrete Block
7. Drilling depth of min 40mm in A,B,C,D materials and 80mm in Aerated Concrete Block
8. Insert cap into countersunk hole in insulation
